

Assignment no 2

Distributed Operating System

- Q 1) Explain adaptive algorithm for load distribution.
- Q 2) Explain requirement of load distributing task migration.
- Q 3) Discuss the various policies of load distributing algorithm.
- Q 4) Explain the concept of load distribution. Discuss issues in load distributing.
- Q 5) State and explain receiver initiated algorithm for load distributing.
- Q 6) Describe major components of load distribution algorithm.
- Q 7) Explain how task migration effect the performance of load sharing algorithm.
- Q 8) Discuss mechanism to select suitable load sharing algorithm.
- Q 9) What are the requirement of load distribution.
- Q 10) State and explain sender initiated algorithm for load distributiong.
